**JAG Endoscopy
Training System**

JETS user guide
A guide for users using the JETS website

JETS website user guide	
Version	2
Approved by	Jessica Butler
Date issued	21 November 2022
Last review date	21 November 2023
Next review date	21 November 2024
Document purpose	Produced for users of the JETS website.
Applies to	All JETS users. Not including individuals that have a JETS training centres or are JAG assessors. For guides for these specific roles, contact the JAG office askjag@rcp.ac.uk

JETS overview

JETS is a an online ePortfolio and certification portal for trainee endoscopists. It supports high quality endoscopy training in the UK by offering training courses for endoscopists and an ePortfolio for trainees to record their procedure data. The system has a framework for trainee certification in a number of endoscopy modalities including, but not limited to oesophago-gastro-duodenoscopy (OGD), colonoscopy, flexible sigmoidoscopy, endoscopic retrograde cholangio pancreatography (ERCP), and endoscopic ultrasound (EUS). Trainees can work towards certification in these modalities, by recording their procedure data.

The JETS ePortfolio is one of the most important methods for logging your endoscopic training and it is recommended you use this portfolio to record all your lists.

All gastroenterology and general surgery trainees at any level can use the ePortfolio and it has been developed to support them to meet curriculum requirements in endoscopy. Nurse, clinical endoscopists and GPs with a specialist interest in endoscopy can also use the system.

JAG certification is aimed at trainees and **not for those who are already independent endoscopists**. JAG certification is not a mandatory requirement and therefore not a requirement for any consultant post in the UK. For further information on this, contact the JAG team askjag@rcp.ac.uk.

Who should use this guide?
This is aimed at anyone who uses the JETS website as a user. This guide does not cover guidance and support for JAG training centres or JAG assessors. If you require support for either of these areas, please contact the JAG office askjag@rcp.ac.uk.

Contents page

Getting access

**Registration**

To register for a JETS account visit the website https://jets.thejag.org.uk/Home

On the home page click on the 'register' button at the top right of the homepage.

The page will ask you to provide your personal details, which includes your 'professional body.' If none of the options in the dropdown apply to you, select 'other.'

If your registration number is not accepted when you try to register for an account, please contact us at askjag@rcp.ac.uk for support.

Resetting your password

If you have forgotten your password and require a password reset, press 'forgot your password'.

Sign in with your sign in name

Sign in name

Password

Forgot your password?

Sign in

You will then be asked to input the email linked to your JETS account, so a verification code can be sent to you. This code may take up to an hour to arrive (we recommend checking your junk or spam folders for the email).

< Cancel

Please provide the following details.

Verification is necessary. Please click Send button.

Email Address

Send verification code

Continue

Upon receiving this email, manually input the code into the next page. Please avoid copying and pasting the code into the field as this may cause an error. This step will allow you to reset your password.

< Cancel

Royal College
of Physicians

Please provide the following details.

Verification code has been sent to your inbox.
Please copy it to the input box below.

Verify code

Continue

Deactivated accounts

If an account is not accessed for a certain period, it may be deactivated due to inactivity. Please contact the JAG office at askjag@rcp.ac.uk to ask us to reactivate the account.

Amending your profile

Once you are logged onto the site, you can amend your profile, which includes your personal details, at any time. To locate your profile page, click on the 'actions' tab on the left-hand side of the screen.
☰ Actions

When you click into the 'actions' menu, you will be able to see an option called 'my profile.'

Actions   ✕

Linking your account to an organisation

Once you have created an account, you can link your account to your organisation to get the most out of your account. You can do this by searching for your site name in the 'work details' section of your profile.

Additional site(s)

Start typing a site name...	⌄	Add

Once you add yourself to the site, you can start recording your lists on the website.

Please note – only services that are registered to the JAG programme will be able to search for their service (this does not currently include services in the Republic of Ireland).

Linking a user to your organisation

Training leads and centre administrators based at a service can link staff from their service to the organisation on the website. If you are a training lead or centre administrator, go to the 'actions' tab on the left-hand side of your screen and select 'organisation admin.'

Organisation Admin

Organisation admin
Once in the organisation admin page, an 'add user' button is available on the top right corner of the page.

☰ Actions

This is a list of all the endoscopists that have recorded a list in the past 3 years. The printout will only include endoscopists who have their training status set.					Add user Print
	⌄	All sites ⌄	Trainees only ⌄	Select endoscopist ⌄	🔘 Freeze headers ⚪ Include hidden Modalities OGD, Flexi, Colon ⌄
Name	Role	OGD	Flexi	Colon	Actions

Add user   Print

Once you have selected 'add user,' a pop-up will appear that allows you to search for a specific user by name, registration number (such as GMC or NMC), or email address (we recommend searching for a person using the latter two options). The user must already have a JETS account.

Once the person appears, click on 'add user' button below, which allows you to add the user to your organisation.

Add an existing user to your organisation

Use this screen to locate existing JETS users and add them to your orgnisation

Setting certification levels

After a user has been linked to their organisation admin page, their certification levels will need to be set. The website has the below levels and the training lead at the service will need to select the appropriate levels that need to be set for each individual.

Certification Level Descriptors	
Not set	has no access.
Trainee	needs direct supervision at all times.
Provisional certification	can perform procedure independently with endoscopist certified for that procedure available in the department.
Full Certification	fully certified to perform this procedure but not training others.
Trainer	fully certified to perform this procedure, training others.

Trainer + TTT	fully certified to perform this procedure, training others and with prior skills training experience (eg attended TTT course).
TTT Trainer	fully certified to perform this procedure, training others and with prior skills training experience and faculty on TTT courses.

To edit the certification levels, click on 'edit' next to their name in the organisation admin page.

Roles on the JETS website

The JETS website allows staff within a service to have different levels of access on the site. This will depend on the role they have in the service. Below is a summary of the roles on the JETS website.

Endoscopist – this is the basic trainee role on JETS. This allows you access to your portfolio, to add procedures and gain certification. This role is standard for anyone that registers to JETS and has their service setup on the website.

Trainer – *set locally* – a trainer can sign off training lists, DOPS, and reflections for a trainee; and view their portfolio. They can also view their own feedback from trainees and other trainers.

Training Lead – the training lead can view and add all staff including trainees and trainers at the organisation. They can set certification levels for staff and can add someone as a trainer. They assign other training leads for their organisation and administrators. Training leads also sign off course bookings and certification applications.

Organisation admin – like the training lead, this role enables you to add or remove endoscopists, edit endoscopists certification levels or assign them as a trainer. This is a non-clinical role.

Deanery – this role allows you to view all trainees at your assigned deanery. You can view full portfolios including certification, and filter by organisation or site level views.

Each centre is responsible for assigning people to the above roles. If you encounter any difficulties with an account, contact askjag@rcp.ac.uk
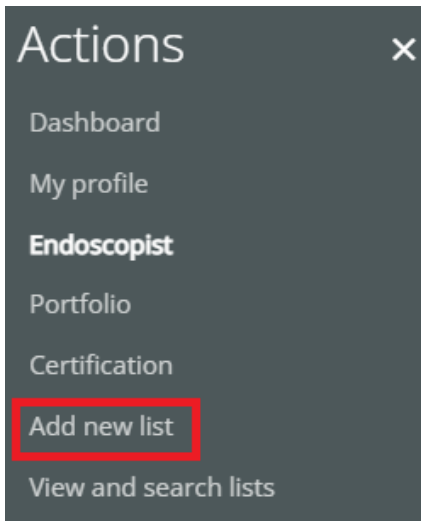

Adding procedures and lists

One of the key functions of the JETS website is the ability to add your procedure data on the site. Once you have access to the site, users can log procedures on JETS. These can be signed off (where needed), by a trainer based at their service.

There are three types of lists that can be recorded on the JETS website:

- **Ad hoc training list** – a trainer is required to sign off this procedure and a DOPS can be completed against the procedures in list.

- **Dedicated training list** – a trainer is required to sign off the procedure and a DOPS can be completed against procedures in list.

- **Service list** – no trainer is required and DOPS cannot be completed against procedures in this list.

To add a list on the website, click on 'actions' and select 'add a new list' to record a list.

When you click on 'add new list,' a pop-up box will appear, where you need to add information about your list.

Select the 'list type,' click the calendar symbol under 'date' to add the date of the list you are adding and select the start time and site where the list was performed. **You only need to select a trainer for ad hoc training lists and dedicated training lists.** Inputting your session identifier is optional.

Once you select 'add new list' you will be directed to this screen:

Here, you input details about the list, including the procedure type. Once you have filled in all fields, select 'save + close'. Your completed list can then be seen in the 'view and search lists' page.

How to view a list

Click on the 'actions' menu in your dashboard and then click on 'view and search lists' to open previously submitted lists.

Use the below filter function to filter lists you have completed (ie by date or by type of list). You can also edit how many lists are shown at once by using the 'show' dropdown.

To click into a list, select the 'view' button next to the list.

You can then view all procedures in the selected list. You can also view any DOPS, DOPyS, PDPs and any feedback added within the list.

How to complete DOPS and DOPyS

To log procedures that will count towards your certification, you can do so by recording DOPS and DOPyS through dedicated and ad hoc lists only.

To record DOPS, you will need to go to your dashboard, click 'actions,' then add new list:

The following pop up will appear:

Complete the mandatory boxes. For service lists, the trainer option will be greyed out.

To record DOPS, click 'add DOPS' under the DOPS column.

This enables you to record DOPS for the following modalities based on the previous data input:

- Formative DOPS: Diagnostic upper gastrointestinal endoscopy (OGD)
- Formative DOPS: Colonoscopy and Flexible Sigmoidoscopy
- Formative DOPS: Endoscopic retrograde Cholangiopancreatography (ERCP)
- Formative DOPS: Endoscopic ultrasound (EUS)
- Formative DOPS: Paediatric colonoscopy
- Formative DOPS: Paediatric Upper GI (OGD)
- Formative DOPS: Percutaneous endoscopic gastrostomy (PEG)
- Formative DOPS: Upper GI Bleeds
- Formative DOPS: Dilation/Stents
- Formative DOPyS: Colonoscopy and Flexible Sigmoidoscopy

The trainer must fill in the DOPS form with scores and comments. Your trainer must sign the form by entering their password in the sign off box at the bottom of the page. This can be done in person

on your account or on your trainer's account. DOPS will only count towards certification once they have been signed off by your trainer.

How to view DOPS and DOPyS

If you want to view a completed DOPS or DOPyS form, you can do this by clicking into the list with the relevant form. You can then see the DOPS that have been added for each patient within the list.

Uploading historical procedures

If you have accumulated procedures from a previous organisation, from overseas or prior to the JETS website's inception, the website has a facility which allows individuals to upload historical procedure data. This is added to the baseline section of the site.

Go into the 'actions' tab and click on 'past placements/baseline.'
Search for the unit through the 'select a service' search function. If the trainee was working abroad enter, 'non-UK.' For Ireland, please select 'Ireland default site.' Enter the date you worked at this organisation and click 'add.'

Data can then be added by for OGD, colon, flexi or ERCP separately by clicking the correct procedure type within the added service.

Service	Start date	End date	Actions
Ireland Default Site	11/06/2020	04/05/2022	Update Delete
Baseline data:	OGD Flexi Colon ERCP EUS ENT Capsule		

You can then enter as much data as possible for each modality in the pre-determined data fields and click 's*ave*' at the bottom of the page. The page will appear as below.

Non Uk	01/06/2022	08/06/2022	Update Delete
Baseline data:	OGD Flexi ⊘ Colon ERCP EUS ENT Capsule		

The data added at UK sites is counted in your lifetime procedure count, which will be reflected on the relevant certification page after addition.

Any procedures performed in a JAG accredited unit in the Republic of Ireland can be added to baseline procedures against the specific site where the procedures were done, these procedures will then count towards the lifetime procedure count. For other non-UK sites, procedures can be added to the baseline and candidates can apply for overseas exception. If approved, these procedures will be added to their lifetime procedure count.

For non-UK baseline additions, an 'Exceptions of overseas procedures on JETS portfolio' form must be completed by a trainee's training lead. Please contact askjag@rcp.ac.uk for information on accessing this form.

Adding reflections

Reflections will only become available after you have entered 50 procedures for your certification. The system will automatically generate a reflection and show it as an action on your dashboard. This will also be accessible in the 'actions' menu.
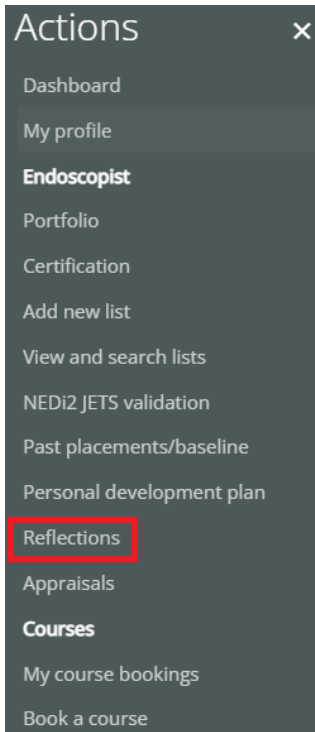

You can also access reflections through the portfolio page.
Please note, these reflections tabs will only appear once you have fulfilled the criteria to complete a reflection.

The reflection will display the KPI's for your previous 50 procedures and ask you to answer questions regarding the data and your progress.

Upon opening the reflection, you will see a brief overview of the 50 procedures, as shown below.

You can then select the 'reflection' tab at the top, where you will be able to answer two questions regarding the procedures, add a personal development plan and get your trainer to sign off the reflection.

Certification pathways

How to view your certification data

The JETS website has a framework for trainee certification in a number of endoscopy modalities, including OGD, colonoscopy, flexible sigmoidoscopy, ERCP, and EUS . Trainees can work towards certification in these modalities, by recording their procedure data on the website.

To work towards accreditation in one or more of the JETS modalities, each individual will use the 'certification' page below to view their progress. This section of the site allows you to review the JAG certification criteria for accreditation and view your progress against the modalities.

You can view your certification data in the 'certification' tab in the actions menu:

The certification dashboard, seen below, allows you to navigate between the different modalities and view your key performance indicator (KPIs) data for each pathway.

Certification dashboard

Please note: Your data is refreshed every evening, your newly added procedures will not reflect in your portfolio or certification pathway until it has been refreshed. Last refresh was 12 hours ago.

JAG Certification supports trainees through a training pathway. If you are an established endosopist you are not eligible to apply for certification.

Pathways

| OGD | Flexi | Colon | ERCP | EUS |

See example below of an OGD certificate and the requirements stated on the left. Under 'status' it indicates if they have met the requirements.

Pathways

| OGD | Flexi | Colon (Provisional) | Colon (Full) |

ⓘ 5 most recent formative upper GI DOPS scoring 'competent for independent practice'	90%	100%	✓
Basic Skills in Upper GI course	Attended	Attended (18/01/2016)	✓

Once a trainee is meeting all the KPI's they are required to submit summative DOPS before they can proceed to the next stage.

Completing summative DOPS

Summative DOPS (direct observation of procedural skills) are forms completed in the OGD, flexi, and colonoscopy modalities. They are observed procedures that are used as certification criteria. After you have hit all the key performance indicators for the relevant certification pathway, you will be able to progress your application to the summative DOPS stage by clicking the 'start application' button on your certification page.

One a candidate clicks 'start application' to begin their summative DOPS stage, the candidate's key performance indicators will be frozen.

Pathways

OGD   Flexi   Colon (Provisional)   Colon (Full)

Current status: Application not started   ☆

> JAG certification criteria were temporarily amended to reflect potential challenges in accessing training and courses. As part of these changes, procedural KPIS were calculated from 6 months data as opposed to 3 months - as per pre-pandemic criteria. We have now reverted back to the 3 month calculation of procedural KPIs.

Criteria bypass allowed   **Start application**

Summative DOPS criteria

Summative DOPS can be carried out in any combination of ways that fulfil the following criteria. For summative DOPS the following conditions apply:

- Minimum of 2 assessors
- Minimum of 2 cases
- Minimum of 4 DOPS
- All must be completed within a month
- No assessor is the current primary endoscopic trainer

Here is an example of how the summative DOPS can be completed:

- 2 x 2 process simultaneously – 2 assessors over 2 cases
- 2 x 2 process sequentially – 2 assessors over 4 cases
- 2 x 1 x 1 process – 3 assessors over 4 cases
- 1 x 1 x 1 x 1 process – 4 assessors over 4 cases

After selecting 'start application', you can add the summative DOPS on the next page, by clicking the 'add DOPS' button.

Summative DOPS

	Date	Assessor	Completed	Passed
Add DOPS			⊗	⊗
Add DOPS			⊗	⊗
Add DOPS			⊗	⊗
Add DOPS			⊗	⊗

A pop up will appear where you can select your trainer for the DOPS form.

Diagnostic upper gastrointestinal endoscopy (OGD)

Endoscopist		Date		Trainer/Peer	
			01/08/2022		-- Select trainer -- ⌄

Cancel

The selected trainer can then fill in the summative DOPS form and sign this off when this is completed.

Colonoscopy and Flexible Sigmoidoscopy

Endoscopist	Date		Trainer/Peer
		30/07/2022

❶ Monitoring				

Cancel

The box next to each item in the DOPS form is marked for competency. Each item needs to have a corresponding 'not competent for independent practice' or 'competent for independent practice filled in for the DOPS to be complete. Comments can be added next to each section.

Once you have completed the required summative DOPS, send them to the assessor who observed the procedure by clicking 'save' at the bottom of the DOPS. Alternatively, if you are with the assessor while completing the summative DOPS they should be able to sign off the form from the trainee's account by inputting their password and clicking 'sign off.'

Completing summative DOPS – common issues.

Issues selecting a trainer

If you cannot select a trainer from the dropdown when completing your summative DOPS, this is likely due to the following reasons:

- Your trainer's JETS account may be inactive; in this instance, the trainer should contact the JETS team to activate their account to gain access.

- Your certification/training levels might not be set correctly. To correct this issue, you will need to contact your training lead or organisation admin so that they can set your training levels. Please see 'setting certification levels' in this guide for more details on how to do this. When your training levels have been set correctly, you should be able to select a trainer.

- Your account needs to be linked to your organisation. In this instance, also contact the training lead or organisation admin at your service to add you to the organisation.

View the training lead and organisation admin access section of this guide to learn more about how to amend certification levels for staff.

Submitting certification

Once a trainee has met the criteria to be signed off for certification, they will be required to send the application onto the training lead at their organisation to get signed off. (This will only be allowed once the KPI's have been met.)

The trainee can add any supporting comments for their application (this will also be viewed by the JAG assessor when they review your application). Then select the training lead and click on 'send to training lead.'

Update profile	Please ensure your GMC, main site and job title are correct Last updated: 07/06/2022		Profile
Declaration	I declare that the data held within this portfolio is true and accurate to the best of my knowledge and the summative DOPS assessment was carried out in accordance with the principles outlined in the JAG.		
Training lead	Training Lead will review your portfolio and forward it to the JAG Selected training lead:		Select training lead
Comment	Detail any information that is being posted directly to the JAG and any issues with your portfolio e.g. gaps in placement history		
Comment(s)			Send to training lead

If there is no option in the drop down to select a training lead, then contact your organisation administrator or training lead who will need to amend your JETS certification levels to allow you to send your certificate to the training lead.

Guidance about this is included in your training lead and organisation administration access section of this guide.

Submitting certification

Once you have sent your certificate to your training lead for checking, and if the training lead approves it, the next step requires you to make a payment on the below fourth tab of your application. Each certification is charged at £70 and needs to be paid before your application is sent to an assessor. Payments can be made by PayPal, debit, or credit card.

Sent to JAG Office – awaiting payment

1. Meet certification criteria >	2. Complete summative DOPS >	3. Send to training lead >	4. Pay certification charge >	5. JAG assessor review >	6. Print JAG certificate

Certification payment
Once the criteria are met, the e-Portfolio needs to be submitted for review by the local training lead for your trust. Once they have approved it, it will be sent to the JAG office.

At this stage a £70 certification fee needs to be paid to the JAG. Once payment is received, the portfolio will be sent to the JETS assessor. Please note that no certification fee is required for full certification (the fee for provisional certification also covers full certification).

PayPal

☐ Debit or Credit Card

Powered by PayPal

Once payment is made, the portfolio will be sent to a JETS assessor for approval.

Review time

A JAG assessor must review your application and provide an outcome. If you have not received an update within 2 weeks contact the JAG team at askjag@rcp.ac.uk.

Declined portfolios

If your portfolio is declined and you need to go through the assessment process again, you will need to pay the fee again. All payments are non-refundable/non-transferable once reviewed by a JETS assessor.

Appealing declined certifications

If you want to appeal a certification that has been declined, you will need to contact the JAG team directly to discuss this with them. Email the team at askjag@rcp.ac.uk.

Accessing certificates

Once you have achieved certification you can access your certificate by going to the 'actions' menu, then select 'certification.' On the following page, you will see the endoscopy modalities. Click into the relevant modality and select 'continue application'.
To download your certificate, click on the button 'view certificate.' The certificate is then downloaded as a pdf.

Overview of JETS portfolio page

In the JETS portfolio section of the website, you can find essential information about your endoscopy history and all other endoscopy related activity that you have recorded in the past. Under the 'actions' tab, select 'portfolio'.
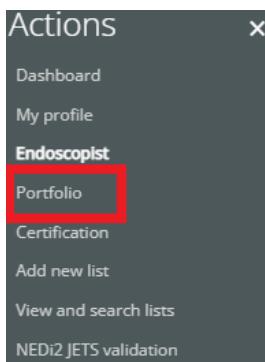

The page will include a list of tabs which contain details on multiple modalities, courses and more.

All   OGD   OGD Thera   Flexi   Colon   All procedures   All DOPS   DOPS overview   PDF summary   Courses   Appraisals

Appraisals

Adding an appraisal

A trainee can add an appraisal at any time during their time at a service. They can do this at the start, middle, or end of their attachment. To complete an appraisal, click on the 'appraisal' tab in the actions menu.
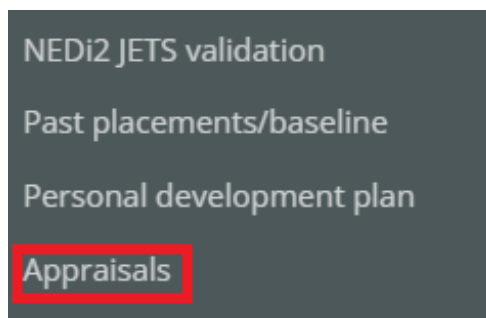

On the following page, you can view your past appraisals and add a new appraisal. Click the 'add new appraisal' button at the top right-hand corner of the page to begin a new appraisal.

A pop up will appear (partially captured below), that will allow you to select your trainer. The 'appraisal type' field allows you to indicate whether this appraisal is being completed at the start, middle, or end of an attachment.

Signing off on appraisals – trainer

After the trainee has signed off on the appraisal, you will be able to access this appraisal from the dashboard. You can review the details of the appraisal, then press 'sign off', as seen in the above screenshot, when you are happy with this.

The appraisal will them appear as 'trainer signed off' in the trainee's account, where a date will appear under this header.

Trainer signed off

Please note: a trainer cannot complete your Summative DOPS if you have done an appraisal on them in the last 12 months.

Training lead and organisation administrator access

Training lead

The training lead within a service will have oversight of the trainees, trainers and all other staff set up on the JETS site within their service. This role can be allocated to more than one person on the website. This is a clinical role. There can be more than one training lead set up for a service.

Organisation administrator

The organisation administrator will have similar access to the training lead and will be able to add staff to the organisation admin page and remove users associated within this organisation. This means users with organisation admin have an overview access, can link users, and set their

certification levels. There can be more than one person at a service with organisation administrator access. This role does not have access to:

- signing off lists, DOPS and DOPyS
- approving users course application, ie basic skills course
- access trainer DOTS feedback report
- trainer evaluation
- NEDi2 organisation validation

Getting access

As a training lead on the JETS website, this will be your view from the 'actions' menu:
There are two ways to be set up as a training lead for your organisation on the JETS website:

Option 1

Get in contact with the JAG team at askjag@rcp.ac.uk with a request to be added as a training lead. Ensure you already have a JETS account.

In your request, provide the following:

- Full name
- GMC/NMC
- Name of your organisation
- Provide a statement from another clinical lead or centre admin in your organisation, confirming that you should have access to this role.

Option 2

Ask the existing training lead or centre administrators at your organisation to give you training lead access. To do this go to the 'organisation admin' page through the actions tab.
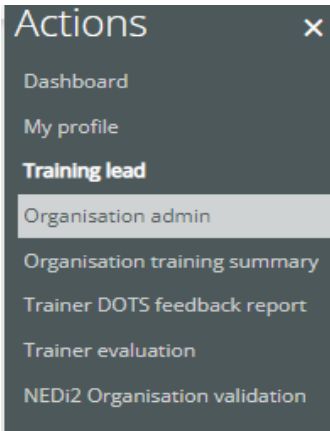

On the top right-hand corner of the page select the 'add user' button.
This will then generate a pop-up box which will enable you to search for the user. You can search for a user by their full name or GMC/NMC number.
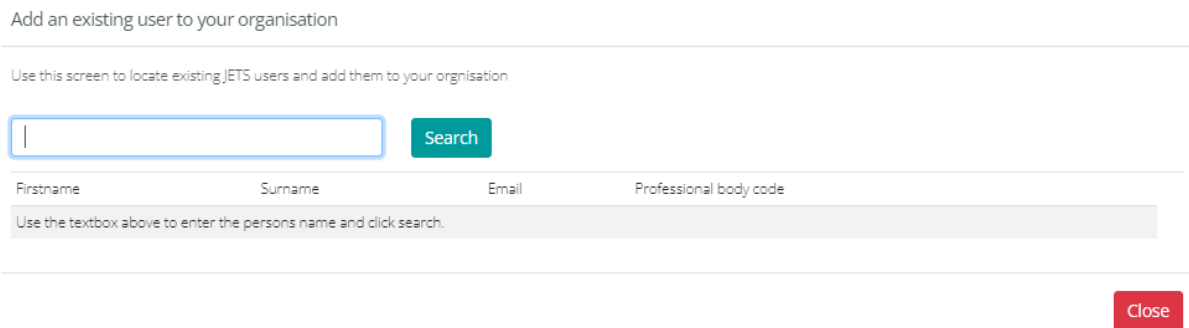

The system will then locate the individual with their details. The individual will appear on the page below. Click the green 'edit' next to their name on the right.
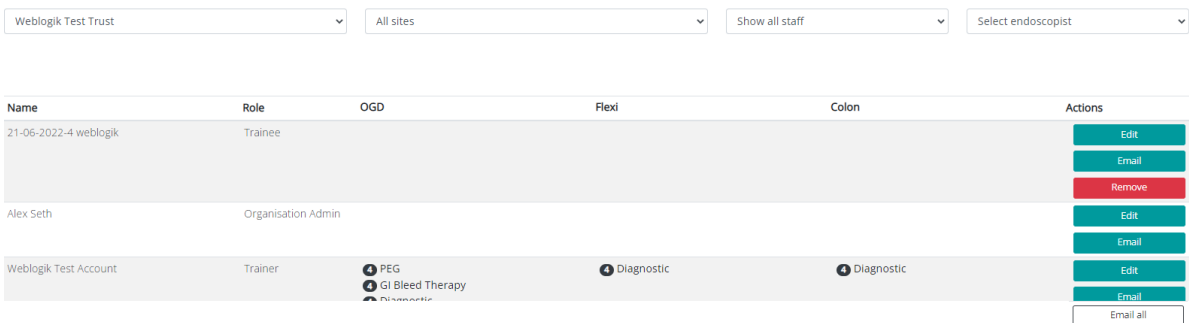

Scroll to the bottom of the page, you will see tick boxes which you can select to provide them with training lead/organisation admin access. This will automatically save.

Admin?

- ⦿ Not admin
- ○ Training lead
- ○ Organisation admin

Viewing and edit staff details

Details of staff in your organisation can be found under 'organisation admin.' You can access this page by going to the 'actions' menu and clicking the 'organisation admin' tab.
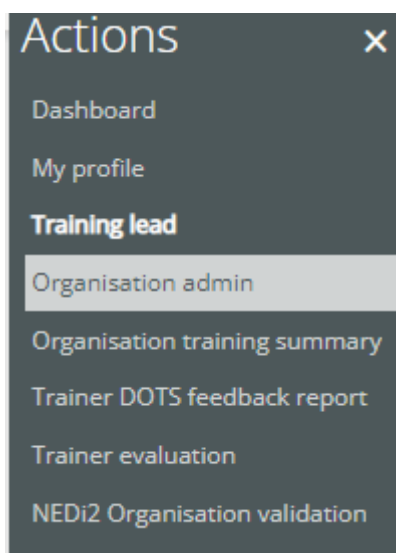

A page will appear with a list of all the staff in the service and their respective details.

Name	Role	OGD	Flexi	Colon	Actions
21-06-2022-4 weblogik	Trainee				Edit / Email / Remove
Alex Seth	Organisation Admin				Edit / Email
Weblogik Test Account	Trainer	❹ PEG ❹ GI Bleed Therapy ❹ Diagnostic	❹ Diagnostic	❹ Diagnostic	Edit / Email
					Email all

At the top of the 'organisation admin' page there are four dropdown boxes which allow you to filter the details of your service and the staff that work there accordingly.

Please note – this page will only show endoscopists that have recorded lists in the past 3 years.

The first dropdown will include the organisations you are the training lead/organisation administrator for and the second allows you to select the site.

Weblogik Test Trust ⌄	All sites ⌄
	All sites
	Weblogik Ipswich
The third dropdown 'show all staff' shown below will allow you to select the types of staff you would like to see appear on the page. The 'select endoscopist' dropdown will include a list of all the staff at the organisation.

Show all staff ⌄	Select endoscopist ⌄
Show all staff	
Trainees only	
Trainers only	
Admin/leads only	

On the right-hand side of the page, you can filter by modality and staff.

Modalities
OGD, Flexi, Colon ⌄

Each staff member will appear on the page for a training lead similar to the below. Each row will show the role (ie 'trainer' below) and the types of procedures they are a trainer/training for currently (ie PEG, GI bleed etc).

Weblogik Test Account	Trainer	❹ PEG ❹ GI Bleed Therapy ❹ Diagnostic ❹ Dilatation	❹ Diagnostic	❹ Diagnostic	Edit	Portfolio
					Email	Profile
					Remove	
The below options are listed next to the staff member. This is what the **training lead** can see on the website.

Edit	Portfolio
Email	Profile
Remove	

The **organisation administrator** will only be limited to the below options on the site and will not be able to view the profile and portfolio of the endoscopist.
Edit
Email
Remove

When you click 'edit' you can amend the certification levels of the staff member.
This will lead you to the following page

For each endoscopist you can amend their certification levels which will determine what they are able to do on the website. This can be done for all the modalities.

Procedure type		Level
OGD	Diagnostic	Training
	Dilatation	Not Set
		Training
		Provisional Certification
	GI Bleed Therapy	Full Certification
		Trainer
	PEG	Trainer + TTT
		TTT Trainer
Flexi	Diagnostic	Full Certification

The 'email' tab allows you to email the staff member directly through the website.
An email is sent from the JETS system. A button opens a pop up which will enable you to enter the text for the email.

Please ensure you include your return email address in your message if you need a reply, as replies will not return to yourself otherwise.

The 'portfolio' button is where you can access the endoscopists profile and view their information.
The training lead can access the below information relating to the staff member. By clicking on these tabs, you can view their information and extract any information that they needed.

All	OGD	OGD Thera	Flexi	Colon	All procedures	All DOPS	DOPS overview	PDF summary	Courses	Appraisals	Certification

The 'remove' option will allow you to remove any staff that no longer need access or no longer work at the service.
Generating a staff summary

As a training lead or organisation administrator you pull from the 'organisation page' to generate a pdf summary of the staff in your service. The pdf summary page can be filtered by timeframe and the different sites where they work.

Click on 'organisation admin' in the 'actions' tab. On the top right-hand side of the page click on 'print' which will generate a document.

Add user   Print

A pdf will generate which includes the following information of the staff at your service.

Name	OGD				Flexi	Colon	Polypectomy		
	Diag	Dilat	Bleed	PEG	Diag	Diag	1	2	3
	Training				Full Certification	Provisional Certification	Full Certification	Training	
	Training				Training	Training	Training		
	Training				Training	Training	Training		
	Full Certification								

To generate a pdf tailored to the information you need, you can amend the details on the page by using the dropdowns on the top of the 'organisation admin.'

Weblogik Test Trust ▾	All sites ▾	Show all staff ▾	Select endoscopist ▾

Signing off certification as a training lead

When a trainee submits their certification for a modality, it will need to be signed off by the training lead at their service. Once the trainee has submitted their application, it will appear on the training lead's dashboard when they login. This is found on the first page at login.

Click on 'go' to access the application.

Certification requires sign off	08/11/2021	Go
The next page will show the trainee's KPI's alongside the required criteria. If you are happy with the KPI's and DOPS, the training lead can add any comments and decide if the application can be approved or if needs to be returned to the trainee. If you do not approve it and decide to return the application to the trainee, the trainee will get an email with your actions and will have the opportunity to undertake any extra steps necessary.

Application Comments

Add Comment

If returning application to trainee please include reasons and objectives set for the trainee before allowing reapplication

Add comment

Application Submission

○ Approve this application - complete declaration and send to the JAG
○ Return application to trainee - trainee will be able to resubmit application using the same summative assessment

Approving course bookings

When trainees apply for courses such as the basic skills course and train the trainer courses, their application will be sent to their training lead to review and approve. This is a requirement and enables training centres to reserve a space for the trainee.

To approve the application, the training lead will need to log in to the JETS website. Training leads also receive an email which leads you the JETS page to approve a trainee's application.

The individual detailed below has applied to a course.

|

{ApplicantName}

Course: {CourseName} on {CourseDate} at {CourseCentreName}

In order to assure that this course is suitable for their needs, you are asked to approve or reject the application.

To do this please login using the following link and review your task list:

{URL}

Alternatively, when you log into JETS you can access the approval screen from your dashboard. The action will show as Course Applicant requires approval.

Until the application is approved the training centre will not progress the course booking.

Please note this is an automated email, do not reply to this email.

Once logged in, go to the 'dashboard' page.

When you login, you will see the below table which will display any outstanding actions under 'training lead' box as shown below.

Training lead		
Action		**Link**
16 endoscopist(s) missing certification levels at University Hospitals	06/09/2022	Go

Endoscopist		
Action		**Link**

Once you have approved the trainee's application, this will be updated on the training centre's side. It is at the discretion of training centres as to whether a trainee's application is approved. Approval from training leads does not guarantee a place.
Courses

The JETS website facilitates the advertisement of JAG approved training courses. All individuals that wish to attend a course, will need to register interest on the JETS website. Course registration is managed by each individual training centre.

Any queries relating to a course, or the availability of a course should be redirected to the training centre. Details of each centre is listed on the JETS website https://jets.thejag.org.uk/training-centres-and-courses/list-of-training-centres/

If you have any queries relating to the course payment or content, contact the training centre directly.

How to book a course

Once you have logged onto the JETS website, click on the actions tab located on the left side of the screen.

Scroll to the bottom and click on 'book a course.'

Search for the course you require or click on the 'specialities and course finder types' to filter the types of courses that appear.

Completing course feedback

To get your course certificate, you need to complete the feedback for the course and training faculty. The feedback is anonymised when viewed by the training centres and provides a key part of
quality assurance of all JAG approved courses. Without completing the course feedback, you will not be able to generate your course certificate.

You can access the feedback form after the course finishes and the training centre marks you as attended. Once you are logged in and have selected the 'actions' menu, go to 'my course bookings'.

Courses

My course bookings

Book a course
If the training centre have marked you as attended, you will then see the green feedback button alongside the course. If this isn't visible, please contact the course administrator for help. The list of contact details for training centres is available in the 'training centres and courses' menu.

Course bookings

Course	Location	Date	Status	
JAG_Virtual_ENDO1 JETS Workforce - Virtual ENDO1 training course	Royal College Of Physicians, London - Virtual Online Courses	29/07/2022	Attended	Feedback

Extracting DOTS feedback

Direct Observation of Training Skills (DOTS) enable trainers to complete assessments on fellow trainers. This will allow users to evaluate the training skills of their peers.

The 'training feedback' is a record of feedback left for trainees.

Also, trainees can provide feedback to trainers at their service after a procedure. Feedback is submitted by trainees and trainers through Direct Observation of Training Skills (DOTS) forms.

Training leads and trainers can access DOTS for trainers in their organisation by selecting **'**trainer DOTS feedback report' from the 'actions' menu.
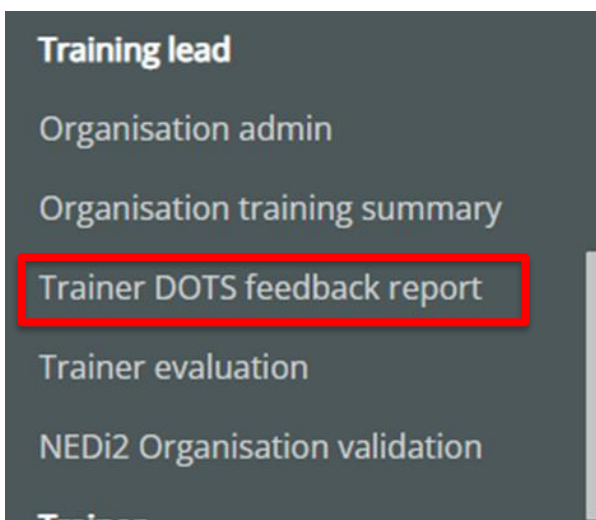

The next page will generate bar charts and a few dropdowns will appear at the top which will allow you to amend the details to generate the information you need. Depending on the information you require, for instance if you are seeking the feedback for a certain trainer, select their name under 'trainer'. Add the timeframe and select 'filter' on the right-hand side.

The details for the trainer will appear below in the bar charts. If you scroll to the bottom, you can also see any comments left for the trainer.
If you would like to print the information generated, this can be done by selecting 'print' on the top right-hand side of the page.

Personal development plan (PDP)

Personal development plans enable trainees to create an action plan based on reflection, goal setting and planning for personal development with set deadlines. Any user set up as an endoscopist has PDP access.

This is where you can keep a log of your PDF. Your log can be extracted to a MS word document for personal use. Any objectives that are logged in procedure lists will automatically populate in this section. You can add objectives by clicking the 'Add new PDP' button at the top or bottom of the page.

This prompts the generation of a pop up to be completed by the trainee.

Procedures on NED

If your site is uploading procedures to the NED live site, they will automatically be uploaded to the JETS website. This means you will not need to manually enter your procedures. Trainees would then be expected to add DOPS, feedback and learning objectives to the lists.

NED uploads will be indicated on your dashboard by a table like the example below:

NED upload

You are uploading procedures to JETS via NED, the table below provides a summary of your NED Uploads. You should not need to manually add procedures performed at the sites listed below to JETS.

Unit	NED	Last procedure	#
	NEDi1	17/08/2022	624

You are using the following ERS systems to load procedures to NED

Supplier	Version	Latest USR
		100.00%

USR - Upload Success Rate from last NED committee review

- Number of procedures loaded in last 6 months

When uploading through NED, it is good practise to check over procedures to ensure they are recording accurately. You can edit or delete any procedure within 3 months of upload. You can also add your DOPS, feedback and learning objectives onto each list.

To do this, go to 'view and search lists,' view the list you want to check, and you will see two options to 'view' or 'delete.' Select 'view' to edit the procedure.

Procedures							New procedure
Service	Date	Procedure type	Patient	Source	Actions	DOPS
	17/08/2022	Colon	F-69	NEDi1	View / Delete	Add DOPS ▾

After 3 months, you will only have the option to 'view the procedure, and you will not be able to edit any details of the procedure.

Procedures							New procedure
Service	Date	Procedure type	Patient	Source	Actions	DOPS
	27/01/2022	OGD	M-72	NEDi1	View	

For more information on NED, you can visit the website: https://ned.thejag.org.uk/ or contact us on askjag@rcp.ac.uk
