DOPS form guidance and descriptors

Pre Procedure		
Consent	 Complete and full explanation of the procedure including proportionate risks and consequences without any significant omissions. Avoids the use of jargon. Does not raise any concerns unduly. Encourages questions to be asked by adopting appropriate verbal and non-verbal behaviours and develops adequate rapport with the patient. Respects the patient's own views, concerns and perceptions 	
Indication	Full and appropriate assessment of the appropriateness of the procedure and any viable alternatives.	
Risk	 Appropriate assessments of peri-endoscopy risks in current patient Considers if patency capsule necessary or reviews result of patency capsule before performing study. 	
Preparation	 Ensures all appropriate pre-procedure checks are performed as per local policies. Ensure procedure is carried out with full respect for privacy and dignity. 	
Equipment check	Ensures patency capsule functions correctly using the patency scanner	
	Patency procedure	
Patency ingestion	Ensures capsule swallowed in safe manner with appropriate resuscitation equipment available	
Patency localisation	 Performs patency scan in appropriate environment at appropriate time after ingestion If patency scanner not being used, or if the scan is positive, then appropriate imaging to localise the capsule is arranged and reviewed. 	
	Post procedure	
Management plan	 Organises capsule endoscopy within appropriate timescale if scan negative or imaging confirms location beyond small bowel. Cancel video capsule if scan positive and patency located to small bowel Clear communication of results and management plan with patient and/or carers. ENTS (endoscopic non-technical skills)	
Communication	Gives and receives knowledge and information in a clear and timely fashion.	
and teamwork	 Ensures that the team are working together from the same information and understand the 'big picture' of the case. Ensures that the patient is at the centre of the procedure, emphasising safety, comfort and giving information in a clear and understandable fashion 	
Situation awareness	 Maintains continuous evaluation of the patient's condition. Ensures lack of distractions and maintains concentration, particularly during difficult situations. 	
Leadership	 Provides emotional and cognitive support to team members by tailoring leadership and teaching style appropriately. Supports safety and quality by adhering to current protocols and codes of clinical practice. Adopts a calm and controlled demeanour when under pressure. Utilising all resources to maintain control of the situation and taking responsibility for patient outcome. 	
Judgement and decision making	 Considers options and possible courses of action to solve an issue or problem, including assessment of risk and benefit. Chooses a solution to a problem, communicates this to team members and implements it Reviews outcomes of procedure or options for dealing with problems. Reflects on issues and institutes changes to improve practice
