

## How the JETS certification fee is spent

---

The money raised by your fee is ring-fenced to fund maintenance and development of JETS to support the training needs of current and future endoscopy trainees in the UK.

This includes the admin costs of the certification process and the telephone and email helpdesk for trainees.

In terms of development, future projects will include new DOPS and modules made available on JETS to support ERCP and EUS training. In addition to this, formative DOPS on GI bleeding are currently being compiled. We also aim to integrate knowledge-based learning modules into the JETS e-portfolio.

Fees are also used to support ongoing technical improvements to [www.jets.nhs.uk](http://www.jets.nhs.uk).
