

# JAG Trainee certification process

## Diagnostic gastroscopy (OGD)

### Certification

There is no provisional phase for OGD certification.

Note – even after achieving certification, JAG recommends that all endoscopists should continue to seek further training on dedicated training lists as part of their ongoing personal development.

### Criteria for certification

The certification criteria are shown in the tables below. The previous three months of data as recorded on the JETS e-portfolio will be used to calculate the procedural data.

Criteria	Requirement
D2 intubation	≥95%
J manoeuvre	≥95%
Unassisted physically (the trainer does not take the scope)	≥95%
Basic skills course	Attended
Recommend lifetime procedures	≥200
Procedures in previous 3 months	≥15
Lifetime formative upper GI DOPS Trainees are recommended to complete DOPS throughout training, 1 DOPS form for every 10 cases	≥20
5 most recent formative upper GI DOPS scoring 'competent for independent practice'. DOPS forms must be completed within 12 months of application for certification. Up to 10% can score 'minimal supervision'. No item in the last 5 DOPS can be scored 'maximum supervision' or 'significant supervision'.	≥90%

Once a trainee has met the criteria above, they are required to complete 4 summative DOPS forms. The summative DOPS must be completed within 1 month. The applicant must score 'competent for independent practice' for all 4 summative DOPS.

Once completed, the portfolio needs to be reviewed and signed off by the trainees training lead and then, if approved locally, to the JETS national assessors.
